

Design constraints :

- basic forms allowed are :

respectively : square – circle – equilateral triangle – circle section triangle - ellipse

plus : standard glassware items supplied by GLASS - ART – ConneXion Heinz KNAPP

- all sets should be well playable (this is occasionally tested out in chess – clubs)
- when not in use, the set should become a decorative piece
- the pieces should reflect their degrees of freedom on the board
- all sets conform to the STAUNTON – rules (maximum and minimum height of pieces, maximum and minimum diameter)
- the sets are well playable on boards with checkers of 35 to 50 mm squared
- a maximum of 11 sets of a certain version will ever be manufactured, of which 9 will be available for sale

Of course, I sometimes brake my own rules:

I am still working on a “MOEBIUS – set” and other strange ideas.
